## What should i study for dmv written test

Departments of motor vehicles in many states offer select services online for the convenience of their customers. You may be able to renew your car registration or driver's license online. Practice tests for the written section of the driving test are available from almost every state's official website. Some states may even allow residents to take the official written driving test online. Find out from your state's motor vehicle office if you are required to take a written driving test. If you are a new driver who has taken a driver's education course, you may already have taken the test to receive your learner's permit. People who have moved from a state that has reciprocal rights with your new home state may not need to take a written test either. Determine whether the written driving test in your state is offered online. If it is, you may need to register with the site and create a user name and password before taking the driver's test. Search online for a practice test or tutorial that you can take before you log in to take the real driver's test. Use the name of your state and "driving test" as keywords to bring up a list of websites that will be appropriate for you to use. Gather all the materials you will need to take the online driving test. You may need a registration form you have been sent and might need to print out your results. Avoid wasting time during your test by finding these items ahead of time. Arrange to take the written driver's test online when you will not be interrupted. If the test is timed, you want as much time as possible to answer the questions without having to attend to other business. Take your online driving test at a time when you fresh, alert and ready to concentrate. If you are a morning person, arrange to take the test right after breakfast. Night owls may decide to wrap up their day with the driving test. You just heard you have a math test on Friday — the same day as your big history test and weekly quiz on Spanish verbs. Are they crazy? How will you get all your studying done? Don't panic. There are some secrets to good studying. These 5 study tips can help you take tests with confidence. 1. Start Studying in School Studying for tests and quizzes actually starts way before you even know you'll have a test. Good study techniques begin in the classroom as you take notes. Note-taking is a way of remembering what you were taught or what you've read about. Some keys to note-taking are to write down facts that a teacher mentions or writes on the board during class. If you miss something, ask your teacher to go over the facts with you after class. Keep your notes organized by subject and making sure they're easy to read and review. This may mean that you need to recopy some notes at home or during a free period while the class is still fresh in your mind. Unfortunately, most schools don't have classes that teach you how to take notes. When it comes to taking good notes, it can take some experimenting to figure out what works, so don't give up. 2. Plan Your Study Time When you sit down to study, think about how much time you want to devote to each topic. This will keep you from getting overwhelmed. If it's Monday, and you've got three tests on Friday, figure out how much time you need for studying between now and then. Then figure out how long each subject will take. For example, a weekly Spanish verb test probably won't be as intense as a big history test. So you won't need to set aside as much study time for the Spanish test — and if you break it up into a short amount every night, that's even better. Another study technique is called "chunking" — breaking large topics down into chunks. Let's say you have a history test on World War II. Instead of thinking about studying all of World War II (which could overwhelm even an expert!), try breaking your study sessions into 2-year chunks or studying the material by specific battles. Most people can concentrate well for about 45 minutes. After that you'll probably want to take a short break. If you find yourself getting distracted and thinking about other things as you study, pull your attention back. Remind yourself that when your 45 minutes of studying are up, you can take a 15-minute break. page 2 3. Study Based on the Type of Test You're Taking Many teachers tell students ahead of time what the format of an exam will be. This can help you tailor how you study. For example, if you know you're going to have multiple-choice questions on World War II, you'll know to focus on studying facts and details. But if the exam will contain essay questions, you'll want to think about which topics are most likely to be covered. Then come up with several possible essay topics and use your notes, books, and other reference sources to figure out how you might answer questions on those topics. As you study, review your notes and any special information from your textbook. Read things over several times if you need to, and write down any phrases or thoughts that will help you remember main ideas or concepts. When trying to memorize dates, names, or other factual information, keep in mind that it usually takes a number of tries to remember something correctly. That's one reason why it's a good idea to start studying well in advance of a test. Use special memory triggers that the teacher may have suggested or ones that you invent yourself. In the case of math or science problems or equations, do some practice problems. Pay special attention to anything the teacher seemed to stress in class. (This is where good note-taking comes in handy!) Some people find it helps to teach what they're studying aloud to an imaginary student. Or work with a study partner and take turns teaching aloud. Another study technique is making flashcards that summarize some of the important facts or concepts. You can then use these to review for a test. page 3 4. Resist the Urge to Procrastinate It's tempting to put off studying until the last minute (also known as procrastination). Unfortunately, by the time students get to high school there's so much going on that there's usually no room for procrastination. If you're a procrastinator (and who isn't sometimes?), one of the best ways to overcome it is by staying organized. After you've written test dates and project due dates on a calendar, it's hard to ignore them. And sitting down to organize and plan your work really highlights how much time things take. Organization makes it harder to procrastinate. Sometimes people put off studying because they feel overwhelmed by the fact that they're behind on things or they just feel really disorganized. Don't let this happen to you. Keep your notes organized, stay on top of required readings, and follow the other study tips mentioned earlier to stay focused and in control. Your teachers will give you plenty of notice on important tests so you have enough time to study for the type of exam you'll be taking. But what if you're feeling overwhelmed by all the stuff you have to do? Are classes or extracurricular activities limiting your time to study properly? Ask your teachers for help prioritizing. You may need to involve the people in charge of your activities — such as your coach or music or drama teacher — in working out a solution. Don't wait until the last minute to talk to your teachers, though, or you'll just look like a procrastinator! And don't be afraid to ask for help. Teachers respect students who are thoughtful and interested in learning and doing well. 5. Start a Study Group Sometimes it can be useful to go over things with people who are studying for the same test: You can make sure that your notes are correct and that you understand the subject. Study groups are also helpful because you can work together to come up with ways to remember concepts and then test one another. For some people who are easily distracted, though, study groups spell disaster because they get off the topic. When you're with a bunch of friends or classmates, you may spend more time hanging out than actually studying. One way to ensure quiet and focus when studying with a group is to study in the library. You'll be forced to keep things more low-key than if you're at someone's kitchen table. In the end, it comes down to what works best for you. If you like to study alone and feel most confident doing it that way, that's great. If you think you'd like to work in a group, try it out — just be aware of the drawbacks. The Payoff When you've finished studying, you should feel like you can approach the test or quiz with confidence — not necessarily that you will get 100% of the answers correct, but that you have a good understanding of the information. Most of all, don't panic if you can't remember some facts the night before the test. Even if you've spent all evening studying, the brain needs time to digest all that information. You'll be surprised by what comes back to you after sleeping. Welcome back to Mid-Week Meditations, Lifehacker's weekly dip into the pool of stoic wisdom, and a guide to using its waters to reflect on and improve your life.This week's selection comes from Seneca. In his Moral Letters (R8-7), he describes the real lessons to be learned from Homer's The Odyssey:Do you raise the question, "Through what regions did Ulysses stray?" instead of trying to prevent ourselves from going astray at all times? We have no leisure to hear lectures on the question whether he was sea-tost between Italy and Sicily, or outside our known world (indeed, so long a wandering could not possibly have taken place within its narrow bounds); we ourselves encounter storms of the spirit, which toss us daily, and our depravity drives us into all the ills which troubled Ulysses. For us there is never lacking the beauty to tempt our eyes, or the enemy to assail us; on this side are savage monsters that delight in human blood, on that side the treacherous allurements of the ear, and yonder is shipwreck and all the varied category of misfortunes. Show me rather, by the example of Ulysses, how I am to love my country, my wife, my father, and how, even after suffering shipwreck, I am to sail toward these ends, honourable as they are.What It MeansScholars and students—from ancient times to this day—toil away trying to figure out and remember all the names, dates, and locations from Homer's epic, but all those details are beside the point. Take a closer look at this line:Show me rather, by the example of Ulysses, how I am to love my country, my wife, my father, and how, even after suffering shipwreck, I am to sail toward these ends, honourable as they are.To Seneca, the real lessons of this story are the moral lessons. I know, surprising right? The Odyssey isn't about cyclops monsters, Trojan Horses, or braving stormy seas; it's about love, honor, temptation, hubris, and perseverance. When you're learning new material, it can be overwhelming when you think about how much time you... Read moreWhat to Take From ItBack in school, teachers may have quizzed you on details from a book, lecture, tour, or film to see if you actually paid attention to the material. It's a system that sometimes works, but it engrains the wrong approach to education in our minds. Instead of focusing on the real lessons of a story—the why—we instead learned to note the who, what, when, and where. We learned to "study for test." It's time to stop that if you haven't already.Most of us are out of school now, and there are no longer tests for us to study for. It's time you learn to study just for you. When you read books, watch movies, and see plays, look for ways to apply the lessons the characters learn to your own life. Unless you plan on being a quiz show winner, there's no need to remember all those little details that don't make you a better person.
