Gold bar blast furnace guide

Osrs gold bar blast furnace guide.

If you try to place more than 28 primary ores without collecting the 28 bars in the dispenser, you will get an error that says "You should collect your bars before making any more." If you notice you're only getting 56 or 57 xp when smelting gold bars instead of 1517 or 1518, you might have forgotten to collect your 27 gold bars. Equipping the ring of charos (a) will reduce the entrance fee to 1250 coins, if you go through the Blast Furnace Foreman's dialogue (1*3+2*3). Instead, use one of the bar patterns described below for smelting the higher-level bars. It is also easier to keep an extra 27 coal in the furnace too so there is less delay for your bars to be ready. The following process can be used for smelting mithril bars: Purchase mithril and coal ores from Ordan in a ratio of two coal for every one mithril. For better rates, use the Barbarian Vial Smash perk unlocked near Barbarian Outpost when sipping energy restores, ideally stamina potions. There is also an anvil nearby to smith your bars, which the foreman will let you use if you have level 60 Smithing. Because every load of gold ore also adds 26 coal to the furnace due to the coal bag, it results in a hybrid method that produces more gp and xp than otherwise. In the Q&A on 11 February 2010, Paul Gower stated that the Blast Furnace was created during an attempt to make a Smithing Guild. Ordan usually sells ore for cheaper than GE price while his stock is 50 or above, so many players choose to supplement their supply of banked ores by buying ore from Ordan when his stock is high. Coal generally runs out first, so players may need to switch to another world or supplement the store's coal supply with banked coal. Full Smithing experience is gained from smelting the bars. The conveyor belt that moves the ores into the furnace has three separate sections turning independently. Operating the Blast Furnace[edit | edit source] This article or section requires a cleanup in order to meet the Old School RuneScape Wiki's quality standards.Reason: ToneYou can edit this page to improve it. A coal bag is recommended if using an ore that requires coal. The use of this feature increases XP and GP rates per hour. Originally, the Blast Furnace did not have dwarves working on the machines. Stock[edit | edit source] Possible methods[edit | edit source] Note: There is a maximum of 254 coal and 56 primary (or 28 adamantite) ore in the furnace. Thus, typically the most preferred production method is to first stock coal to 254 before adding primary ores such as Mithril, Adamantite, and Runite ore. At the Blast Furnace, the following Smithing XP can be gained producing bars. On blast furnace activity worlds, the minimum amount of money that should be deposited in the coffers is 109 if running, and 217 if walking. Travelling and getting to the Blast Furnace[edit | edit source] From Seers' Village and Camelot, follow this path. The suggested inventory is a bucket of water, a coal bag (if needed), and 26 ore. IMPORTANT: For 72,000 coins per hour, the Blast Furnace is maintained by dwarves on designated Blast Furnace Worlds. Requirements[edit | edit source] Start The Giant Dwarf to gain access to Keldagrim. An empty bucket spawn and water source can be found nearby. The Blast Furnace is a members-only minigame situated in Keldagrim for smelting bars. There appears to be an in-game bug that lets you deposit up to 28 more gold ores after having placed 27. On Blast Furnace themed worlds, there is an additional 72k gp/hr fee to use the Blast Furnace; players can either place coins in the coffer near the bank chest, or pay the Blast Furnace Foreman directly. Gold Only Mithril Only Gold/Mithril Adamantite Only Gold/Adamantite Runite Only Gold/Runite Average XP/Trip 1573.6 540 1120 6 506.25 1299.13 540 1420 9 Average GP/Trip −5.852 4,284 377 4,131 −970.67 7,840.8 643.5 As an example, doing 1,000 trips of gold/adamantite would result in 1,299,130 xp and −970,667, while 500 trips of gold followed by 500 trips of just adamantite would result in 1,039,925 xp and −860,500. The Blast Furnace is located in Keldagrim. This shop stocks ore used for Smithing. An inventory will consist of the coal bag, goldsmith gauntlets, ice gloves, and either 26 gold ore or 26 mithril, adamantite, or runite ore. Mithril-processing using the shop[edit | edit source] Ordan sells a range of ore types, from copper up to mithril, which players can purchase to train Smithing without mining ores. Hybrid Bar Patterns[edit | edit source] The following are are the hybrid bar patterns when combining gold and another ore. The process for operating the Blast Furnace is as follows: Notes Always keep your coal bag full. To enter Keldagrim, the player must have started the quest The Giant Dwarf by speaking to the Dwarven Boatman within the mines east of Rellekka. This requires you to stand north of the coffers and to move directly towards the conveyor belt on the same tick as depositing the gold. However, if the coal is paired with another ore, such as iron or mithril, it will remain on the belt after disconnecting. This method only works on mithril and above, as steel only takes a single trip, eliminating the ability to use the hybrid method. Make two trips with 27 coal or one trip with a coal bag and a full coal inventory. When the shop reaches 100 of a particular ore type the extra are "sent to storage". These patterns assume you have a coal bag. Following these patterns you should never have to run back to the bank with ores, and never have to make a trip just to pick up bars. For maximum efficiency, stamina potion should be used. This will show that you have only 28 gold bars to be collected, but there might be up to 55 gold bars to be collected. Runite + Gold Hybrid4:3:1 ratio of coal, gold, and runite. Level Bar Trip 1 Trip 2 Trip 3 Trip 4 Trip 5 30 Steel bars 27 Coal, 27 Iron, Collect 50 Mithril bars 54 Coal 27 Coal, 27 Mithril, Collect 27 Coal, 27 Mithril, Collect 70 Adamantite bars 54 Coal 27 Coal, 27 Adamantite, Collect 85 Runite bars 54 Coal 54 Coal 27 Coal, 27 Runite, Collect 27 Coal, 27 Runite, Collect Gold + Coal Hybrid Method[edit | edit source] With the coal bag, making gold and any ore that requires coal (except for Steel) can be a more efficient method for xp and gold generation. If you log out or disconnect while only coal is on the conveyor belt, it will be permanently lost. Withdraw stamina potions and gold as needed depending your level. Buy ore from Ordan who runs the Ore Seller shop (up to mithril). Doing this will give you the 56.2 xp for smelting gold bars with the goldsmith gauntlets until you've reached the 28 waiting to be collected, and then you will get 22.5 * the amount of extra gold bars when you collect them. The map on the left shows a path the player can take walking from Seers' Village/Camelot to the mines east of Rellekka. Smithing level 60 (cannot be boosted) or a 2500-coin fee to smelt bars with the furnace for 10 minutes. Lvl Money making guides Bars/Hour XP/Hour Profit/Hour 15 Smelting iron bars 6000 75,000 171,120 30 Smelting steel bars 5400 94,500 535,320 50 Smelting mithril bars 3600 108,000 727,920 70 Smelting adamantite bars 2700 101,250 697,320 85 Smelting runite bars 2150 107,500 1,432,020 Collecting raw materials[edit | edit source] Raw materials can be obtained in two ways: A player can have ore in their bank, and use the bank chest conveniently located in the Blast Furnace itself. Therefore, on a busy world, Ordan's stock will often be at less than the max of 100 (which is especially true with coal). Always check current selling prices, as these numbers can change frequently. Note: Remember to deposit coal first if not working with pure iron or gold! It is highly recommended to wear weight-reducing clothing to save run energy while moving heavy ore and smelled bars (Note: the Spottier cape and the Boots of lightness will reduce your weight by an additional 1kg over the Graceful cape and Graceful boots). Bar Smithing Default Coal bag Lvl XP Bars/HR XP/HR Bars/HR XP/HR Bronze 1 6.2 2900−3400 18.0k−20.1k No change Iron 15 12.5 5800−6850 72.5k−85.6k No change Silver 20 13.6 5800−6850 78.9k−93.2k No change Steel 30 17.5 2900−3400 50.8k−59.5k 4650−5450 81.4k−95.4k Gold 40 22.5 5800−6850 130.5k−154.1k No change Gold (Gauntlets) 40 56.2 5600−6600 314.7k−370.9k No change Gold (Smithing cape) 99 56.2 5800−6850 326.0k−385.0k[1] No change Mithril 50 30 1900−2250 57.0k−67.5k 3150−3700 94.5k−111.0k Adamantite 70 37.5 1450−1700 54.4k−63.8k 2400−2800 90.0k−105.0k Runite 85 50 1150−1350 57.5k−67.5k 1900−2250 95.0k−112.5k 1 At "tick-perfect" rates, players can achieve upwards of 420,000 experience per hour. A ring of endurance may also prove helpful. The shop is restocked by dwarves that regularly enter the room and deliver a number (around 30) of one type of ore to the shop, rather than restocking 1 of every ore periodically. If using ice gloves and goldsmith gauntlets, remember not to equip the ice gloves UNTIL the smelting process is complete and you receive the xp drop. Mithril + Gold Hybrid2:1:1 ratio of coal, gold, and mithril. Either put all the bars into the bank using the Blast Furnace bank chest or smith the bars into items and then deposit them. Coins can also be used to pay the Blast Furnace Foreman for more time or to purchase ore there from Ordan. Level Bar Trip 1 Trip 2 Trip 3 Trip 4 50 Mithril bars 26 Coal, 26 gold, Collect 26 coal, 26 Mithril, Collect 70 Adamantite bars 26 Coal, 26 Gold, Collect 26 Coal, 26 Adamantite, Collect 85 Runite bars 26 Coal, 26 Gold, Collect 26 Coal, 26 Gold, Collect 26 Coal, 26 Runite, Collect Changes[edit | edit source] Gallery[edit | edit source] The historical bar stock, replaced with Make-X Trivial[edit | edit source] Contrary to popular belief, the temperature of the stove does not affect the chance of a pipe becoming broken. The outside of the building. Bar Patterns[edit | edit source] Each bar has an optimal pattern to minimise the amount of running to the bank. The max amount of coal which may be placed in the Blast Furnace is 254. These patterns require a coal bag, and have one less inventory slot due to needing the goldsmithing gauntlets in your inventory. The furnace here only requires half as much coal when smelting usually, so it can be useful when smelting the ores that require more coal. It is recommended to prep the Blast Furnace with an additional 26 coal to cut-down on any coal-transfer wait-time when depositing ore. When using ice gloves, replace the bucket of water with an ore. You can also wait for the bars to cool before taking them out. Suggested materials/inventory setups[edit | edit source] A map of the Blast Furnace room itself. Note: The table below has already taken into account the 72k gp/hr fee for using a designated blast furnace world. Doing so too early will award you 585 xp instead of the usual 1517. Adamantite + Gold Hybrid3:2:1 ratio of coal, gold, and adamantite. Operate the Blast Furnace to obtain 27 mithril bars as described in the Operating the Blast Furnace section. They were added due to player complaints of saboteurs breaking the machines constantly. Money making guides[edit | edit source] The Blast Furnace provides a great opportunity for players to reap great profits by producing a large volume of bars. Repeat these steps until the shop runs out of ores. Once the player has visited Keldagrim at least once, they can return via mine cart from the Dwarven Mines under Ice Mountain or the Grand Exchange, or use the Grouping teleport to teleport right outside the Blast Furnace building. Oddly, the bar dispenser doesn't work while a dialogue box is open. Ice gloves or bucket of water (optional), used at the bar dispenser to cool the heated bars as they come out. If you have less than 60 smithing, you will need to pay a fee every 10 minutes. Moreover, the following assumes that the player has a coal bag in their inventory and are wearing ice gloves, thus there are 27 inventory slots occupied by ore. There are 15 Blast Furnace worlds on Old School RuneScape, all of which make soloing the Blast Furnace easy as there are five different dwarves - Dumpty, Stumpy, Pumpy, Numpty, and Thumpy - operating the mechanics of the Blast Furnace, so the player only has to focus on running the ores to the conveyor belt. Ordan the Ore Seller[edit | edit source] Main articles: Ordan and Ore Seller The Ore Seller, run by Ordan, is one of many of the stores in Keldagrim and can be found downstairs in the Blast Furnace factory in the eastern side of Keldagrim. These numbers assume the use of a coal bag, ice gloves, and 36 doses of stamina potions per hour. The max amount of primary ores such as Mithril, Adamantite, Runite and Gold which you can place is 28. However, only the outer two are connected to the pedal mechanism; the inner one turns by itself. On all other worlds, there is no extra fee but players must work together to operate the Blast Furnace. Note that while it is not possible to purchase Adamantite or Runite from Ordan, it is possible to purchase coal from Ordan in order to to make these higher-level bars. However, due to the limited stock and the large quantity of coal required for the higher-level bars, this is not recommended.
