Requires: Android 4.0.3 and up apk 93 MB Mirror: APK 93 MB Google Play Links For information Download a Pixel UI An APK V2.1.7 pack icon | 97 MB | Recovery links | Requires: Android 4.0.3 and up to | Pixel icons with 2K SuperHD + resolution (300 x 300)! Pixel One UI An Apk Pack Icon more recent functionality What's new to 35 new icons; 5, 4845 Total icons; 5, 4800+ App supported; At 130 total resolution 2k wallpapers; A new graphical interface! Added multilingual support! Added support for many new 5 5 launchers! REVIEW APP: Each icon has been designed with extreme care of the details! Triple rendering process icons! Automatic masking for missing icons! Dynamic Calendar for Action App & Google Calendar! Missing icons Request directly through the application (3 free for each release)! Periodic update, guaranteed! COMPATIBILITY: Most of the main launchers on the playstore are compatible, ABC, Action, ADW, Apex, Atom, Aviate, Go, Holo, Holohd, Itop, KK, Lucid, M, Mini, MN, New, Nougat, Nova, S, intelligent, alone, V, Zenui, zero. You can still be used with many other launchers that icon support packages, but are not specified inside the application itself, such as arrow, ASAP, Evie, Cobo, Line, Mesh, N, Peek and Z Launcher, with Xperia home and with the cyanogenmod engine theme, directly applicable in the setup menu launcher used through theme / icons section; Not guaranteed compatibility with LG House Stock Launcher (should work until the Android version 6.0, but I have no way to check personally), you can't apply to Shareholders of Samsung, Huawei, Nubia, Meizu 5 | Icon Pack has been tested personally with no problem with: Nova Launcher; Apex Launcher; Evie Launcher; Action Launcher 3; Hola Launcher; Yandex Launcher; Zen UI Launcher; That the mobile phone does not intend to update to Android 11 A or who is going to do it later than Expected 5 5, does not mean that you can't enjoy the news in the latest version of Android on the device in advance time. Thanks to the functionality of customization of the Google operating system, it is almost completely completely transforming your mobile to a pixel with Android 11, and to do so, everything you need is to use adequate applications and tools. You can transform your mobile to a pixel with Android 11 using these applications. These Android 11 functions were already in Samsung Cell Phones Let Departure at the beginning. If you want to enjoy the most similar experience as possible to what a pixel with Android 11 would be to offer, the first thing you need is a pitcher. Although there are dozens of pitchers who simulate the Android experience, in this case we are going to opt for what the more is the one included in Google Telephones: CPL or. With this launcher, you will not need to run any adjustment to make your mobile screen mobile as much as possible similar to that of a pixel. It is sufficient to install the application and start enjoying the experience. After installing the startup program, remember to use it as Default boot instead of the pitcher included in your mobile by default. The Android 11 launcher we have used offers the possibility of using third-party icons packages for Android, you will use a package with a design traced to that of the native Android 11 icons. This is Pixel Q Icon Pack, a package that includes more than 10,000 icons of the most popular applications. When you have set it, just access the startup settings and choose Q Icon Pack Pixel as Icon Pack to use within the section 5 5 5 "Topica". Activate gesture navigation another optional detail, which it will depend on your tastes and habits when using your mobile phone, it is the navigation of Android Gesture 11. The process and operation of these gestures are the same as those of Android 11, then the steps to activate the gestures of the Android 11 - exactly the same. Replace the Quick Settings panel with Android 11 with Android 11, Google has decided to significantly modify the Quick System Settings panel. Now we will meet six icons instead of nine and take multimedia playback controls in your section inside of this panel. To replace the fast settings panel of your mobile phone with that of Android 11, everything you need is a free call call power sha de. When installing it, you just have to grant you the necessary permissions and activate it. Subsequently, you can customize it to your liking. And if you want to enjoy the entire Android 11 experience, we advise you to activate the option 5 5 5 "integrated multimedia players in rapid settings ", in the menu 5 5 5 " RASS 5 5 5 " of the menu of the menu app. In this way, the media player will appear directly on the panel as in pixels with Android 11. Quick settings Edit in Android 11. Use the control of the Android volume 11 the native volume control of the Android 11 system. Fortunately, thanks to the apps as Ultra Volume You can replace your mobile phone volume control with Android. Just download the app, grants the necessary permissions and choose the theme called 5 5 5 "Android 10". So you can change the accent and background colors if you want or keep the originals. This is the control of the Volume of the system in Android 11. Now, the phone should already look very similar to a pixel with Android 11, but you can always take a step forward. Some developers have decided to move forward and create apps that simulate some of the best Android 11 features and You take any other device regardless of your version of Android. For example, with DirectChat you can have notifications to Android 11 bubbles on any mobile phone. Furthermore, if whatever you want is to discover a new way to use your phone, the app Tap, tap allows you to configure shortcuts with a double touch on the back of the phone, something that is already in iOS 14, and that everything that points will be soon or later comes to Android 11. The news of a NDROID 11 which only reaches the pixel and this is everything. As you can see, it was possible to completely transform your mobile without the need to update the Android version or use complex or advanced procedures such as root or ROM changes. Now all you have to do is enjoy the 5 5 5, apps and notifications> Advanced> Default apps> App Home. These settings menus may vary depending on the Android phone you use, but it is generally similar. Use the search bar at the top of the settings to search for 5 5 5 "launcher 5 5 5 " or 5 5 5 " 5 5 " home 5 5 5 " if you don't find it. The Larschai looks very similar to an Android pitcher on pixel cell phones. Google's search bar is down, the date and temperature show up, and icons have a stock look. Browse up to the bottom to access the app drawer. Download: 5, LawnChair 2 for Android 5 5 (free) 2. Enable Google feed for a pure Android experience in Android vanilla, you also have access to Google's feed when you slide left onto the homescreen. LawnChair offers this as add-on. Go to LawnChair Lawnfeed and download the APK. You should manually extend the Android app. Lawnfeed starts automatically after installing it, but if there is a problem, restart the phone. If you still don't see it, press a long time in any empty space on the main screen to see the Larschai menu, then touch LEARNING Home > 5 5 5 Plugins> Turn on the app. View Google App 5 5 and try again. 3. Get the icons, the theme and style of Google A large part of the Android pitcher is the style and icon package. You can reproduce it through both a downloaded Google Pixel icons package and the lay settings. Once downloaded and installs the q icon pack connected under, back to ThannochChair menu> 5, A, home settings> 5, 5 5 5, icon packs 5 5 and select pixel q icon pack. Subsequently, back to themes and touches the shape of the icon changes, followed From a circle. Finally, in Temas, it touches more "and allow you to create adaptive icons, 5 5 Create adaptive icons for icon packs, and color backgrounds. Download: 5, Pixel QA 5 5 5 " Icon pack for Android 5 5 (free) 4 . Get the IL Android Android watefiche Shaud Shase Pennchair could be the best Android Android launcher, but has not been changed as you look at the shadow of notifications when you slide it. The best Android notification notification application is the power tone. Install it and go through the steps to grant access to different levels. Android requires several permissions to get the power and running tonality. On some Android versions, it is necessary to give power permission for each app to interact with it. It's a pain to fit up, but if you want the pure Android experience, you could do it. Even the default blue shadow color is not equal to what Android uses. But since it is one of the best apps to customize the shadow of Android notifications, it is possible to change the color. Go to POWER start-up learning> The colors and insert the Hex Android color code android # 4885D. Download: 5, Power Shade for Android 5 5 (free purchases, in-apps available) available)
