Using a standard 8 oz/250 ml measuring cup which contains approximately 106 g of Pro Plan.

Puppies start to nibble solid foods at 3 - 4 weeks of age. Keep moistened Pro Plan available at all times. Allow your puppy to eat at will until fully weaned (6 - 8 weeks). After weaning, Pro Plan can be fed moistened or dry. For best results, develop a regular feeding schedule such as three small meals a day for younger puppies. You can gradually reduce to one feeding in the morning and one in the evening as your puppy ages. The routine should not vary.

As puppies near adulthood, their calorie needs may drop, and your puppy may begin leaving some food in the bowl. Don't misinterpret this as an indication of dislike for the food. Instead, begin offering less so your puppy doesn't overeat and stays in ideal body condition.

Nestlé Purina Research indicates that avoiding overfeeding of puppies may help their development. Maintaining ideal body condition is key to encouraging proper growth in all puppies, especially large breeds. The indicated amounts are only a guideline. If your puppy becomes overweight, a reduction of your puppy's daily food intake may be appropriate. You may wish to consult your veterinarian about a weight control program.

RECOMMENDED FOR GROWTH This product is for growth of large breed puppies and maintenance of adult dogs — not for reproducing or lactating females. If you have a pregnant or nursing female, we recommend Pro Plan Focus Chicken & Rice Formula or Pro Plan Focus Lamb & Rice Formula puppy foods.

MAKING THE SWITCH TO PRO PLAN Although you'll be anxious to see the difference Pro Plan can make in your dog, please allow 7 - 10 days to ease the transition from your dog's current food. Each day, simply feed a little less of the previous food and a little more Pro Plan until you're feeding Pro Plan exclusively. This gradual transition will help avoid dietary upsets.

Provide adequate fresh water in a clean container daily.

For your pet's health, see your veterinarian regularly.

How much should i feed my chow chow puppy. How often should i feed my chow chow puppy. How to feed chow chow puppy.

Apart from that, try to avoid free power as it can quickly lead to weight gain and create different problems for your chow chow, such as arthritis and joint problems. There, 3. This guide (updated) list everyone The best dog foods for Chow Chards this year, Dog food is 100% grain-free, contains a protein source, and has zero artificial ingredients so that your dog can enjoy a nutritious meal without getting diarrhea or pruriginous skin. 4. - Merrick BackCountry Block-dried Great Great Plains Red Recipe Dog Food Top 5 Ingredients: 1. Here is a detailed explanation of what these macronutrients are and what you should search when choosing dog food: 1. Avoiding the dog to become Obese obesity is an important issue with chow chance for two reasons: One is that they are lazy, and the second is that it is difficult to know if they are obese. What makes this problem even worse is that it's very difficult to identify when your chow is becoming overweight. Beer rice, 5. Sweet potatoes and peas are a great source of easily digestible carbohydrates, while fruits provide vitamins, minerals and antioxidants to encourage cellular repair and immunity. The elderly the diet of a senior chow is not very different from that of an adult. It also contains omega-3 and omega-6 fatty acids to promote skin nourishment and make the most softer coat of your chow and more luster. Because dog food is dried to the air, it has a better nutritional profile than food for conventional dogs and contains zero preservatives. Adult adults Chow Chows prefer to live a more sedentary life of puppies. But apart from that, food is rich in various vitamins, minerals and antioxidants to offer your dog an all-around nutrient diet. On the contrary, by-products contain organs and pieces rejected or Without much nutritional value. So what is the best dog food for your chow? 7. - NUT NATURAL CHOICE NATURAL Lamb lamb senior & Brown rice says Docu dog food top 5 ingredients: 1. also contains a a Ingredient called Green Cousel, which acts as a source of glucosamine and chondroitin and promotes good joint and bone health. You can serve the captins as it is or rehydrate them for a meal full of raw flavor and texture. Dry dogs Top 5 ingredients: 1. Always memorize these foods in a safe position and never leave them out in the open. Fats are also the best energy source than proteins & 6
