Touch Forget the device. iPhone 7 won't sync with FITBIT, what do I do? Advertising tried all the troubleshooting methods on the website. Powered and turned off Bluetooth. Phone on and off. He re-inited the Fitbit. It's in synchronization all day, but it was synchronized for the last time, just before I took my new iPhone 7 out of the box. Both items are fully loaded and I am in the latest version of the app (I just download it on my new phone!) I just got my new iPhone 7 and I'm so disappointed that it won't keep in constant synchronization with my FitBit charge. HORA. I can go to my Fitbit app and do it manually, synchronize it and iPhone7, but at the time I leave the Bluetooth configuration, my iPhone is no longer recognized. This means that I can't get notifications that no one is calling me and my fitbit should be synced manually every time. I've tried all the tricks (offering the phytbit and the iPhone turned off, forgetting the device in the FitBit app and in setting My phones, removing my Fitbit tracker from my app and adding a new tracking device). Does anyone know when Apple gets out with a solution? TheAT & T store suggested I buy an Apple watch, of course, but I'm pretty happy with my fitbit and iPhone when they're compatible. If you find that your tracker won't sync with your application, there are some things you can try. try. The following list goes from the most simple corrections to the most DRAsitic measurements. Make sure the battery of your tracker is loaded. If your tracker is dead, you can not synchronize with your phone. Close the Fitbit application and then opens again. Each time you open the application, you must start a synchronization. Turn off Bluetooth, then turn it on again, and then open the Fitbit application. This will temporarily stop the Bluetooth connection that will force it to reconnect and could help the problem. Try turning off your iPhone again. The old faithful trick can sometimes return his phone to reality and solve mysterious problems. Uninstall and reinstall the Fitbit application. This could be especially crucial if you have recently updated the Fitbit application and that is why you began to have problems. Try restoring your Fitbit tracker. This is an option for strange circumstances, but in some cases it can certainly help restore any connection problem. Restart your tracker is different for each model and take several minutes to complete. How do problems with notifications? If you have reviewed the previous list and you can not get notifications to work: Restart your Fitbit 2 charge on your mobile device, go to Settings> Bluetooth. Turn off Bluetooth, wait 10 seconds and then turn it on again. Restart your iPhone or mobile device. If the notifications do not work after restarting and restarting, try the configuration process again: inform your mobile device that "forget" your tracker: on your mobile device, go to Settings> Bluetooth. Touch your tracker and then touch Forget it. Close the session of Fitbit application. Restart your mobile device. If your tracker was not synchronized, restart you using the instructions in. If your tracker is not synchronized after the restart, try to start session on your FitBit account in a o Different mobile computer to help determine if the original device is the original device. . How to synchronize Fitbit 2 load to Android devices The difficulty of synchronization is usually caused by a missing requirement. Check everyone before moving on to the Steps.
