The Druidraft tarocle was my first deck in 2007. I learned to read using the companion book and it was a beautiful journey. I love having this app on the move while I browse my days. days. Like the summaries and the fact that I can read the full text of the book. I use the "Draw A Card" function for most ALL.MY only the modifications to the app would be the possibility to search for a specific card and have a history of the cards that I drew archived so that I can meditate on the models that are coming up. Thank you for this wonderful addition to my tarot practice! I was a little skeptical using a deck of tarot cards on my phone, but he's had this Druid Tarot app for over five years and just love it. It works whether I have Internet or mobile or not, and I always get insight from my readings that somehow they still come out. Even this stick is so vivid and clear, the symbolism speaks to me- do not regret buying it for a second! I use in connection with the physical stick that came with a short book. This comes with the complete book, so I can really learn the cards. Great app, but as another comment, I'd like a story of cards that I drew. Even more than that, I would like to insert my cards from an external reading into a specific spread. But I really love this app!
