(Image credit: Universal) The Invisible Man is one of the first Hollywood movies to start streaming early, as the industry looks to make up for lost profits due to the coronavirus and keep many of us entertained as we self-isolate. First released in cinemas on February 28, it's now available to buy on-demand in many countries - so here's how to watch The Invisible Man online wherever you are.The Invisible Man cheat sheetReleased: 2020Director: Leigh WhannellCast: Elisabeth Moss, Aldis Hodge, Storm Reid, Harriet Dyer, Michael Dorman, Oliver Jackson-CohenRun time: 124 minutesRating: R / 15Very loosely based on the 1987 H.G. Wells novel of the same name, The Invisible Man builds on the legend of the titular character and brings it forward to the 21st century. In this re-imagining, Cecilia - played by Elisabeth Moss of Hulu's The Handmaid's Tale - leaves a violent relationship in the dead of night and goes into hiding. Missed The Handmaid's Tale? He uses his abilities to stage his own suicide, and continue to terrorize her unseen. No one believes her version of events, so she decides to fight back and - we won't say anymore, because we wouldn't want ruin this fantastic film for you.The movie fared very well at the box office after its release back in February and was equally well received by critics. So as one of the first blockbusters to come to VOD early, we reckon it's worth coughing up the price of a cinema to beam it to your own home. With that in mind, here's how to watch The Invisible Man online - streaming from nearly anywhere in the world is easy with the help of our guide.Stay entertained where you are with Disney PlusIn an ideal world, all of us would be at home and following our government guidelines on self-isolation during these difficult times. However, the fact is that some people will still find themselves away from home for various reasons, and if that's the case you could be forgiven for wanting even a smidgen of home comforts by way of access to the streaming services and content you normally access. Unfortunately, this isn't always possible due to geo-blocking. Fortunately, there's an easy solution. Downloading a VPN will allow you to watch movies like The Invisible Man and much more no matter where you are. This simple bit of software changes your IP address so that you can keep streaming movies and TV shows from all over the world. While there are hundreds of VPNs to choose from, we always recommend ExpressVPN. As well as being fast, simple, and straightforward to install, it's also compatible with a whole host of devices - Amazon Fire TV Stick, Apple TV, Xbox, PlayStation, iOS and Android to name some of the main ones. Plus, ExpressVPN's flexible 30-day money back guarantee is difficult to argue with. How to watch The Invisible Man online in the US Streaming The Invisible Man in the US is easy and it's available to watch on a large number of services. The one that will be most familiar to most people is Amazon Prime Video. No, it's not free like so much content is for Prime subscribers - get a FREE 30-day trial to see what's on offer - but it's still fairly priced. Prime Video lets you rent The Invisible Man in HD for \$19.99. This gives you 30 days to start watching the movie and 48 hours access thereafter. If that sounds like a lot, just consider how much a cinema ticket typical costs and that is practically the same thing - and you won't have to pony up a small fortune for the popcorn. Another decent option is Fandango Now, where you'll also find The Invisible Man priced at \$19.99 in both HD and SD. But it may not be as convenient, as we expect while most people have an Amazon account, some people may be less familiar with Fandango Now. If neither of those are suitable for your needs, The Invisible Man has a dedicated website outlining all of the ways you can stream it and watch it online. And remember that if you find yourself out of the country, you can use clever software like ExpressVPN to watch The Invisible Man on US-only services like Fandango Now just as if you were at home. How to watch The Invisible Man online: UK streaming options Those in the UK currently wanting to watch The Invisible Man will find that their options are very similar to the US. This means that the film can be easily rented through Amazon Prime Video, where it's priced at £15.99 - which again, gets you a 30-day window to watch the film within 48 hours. And likewise, while the film doesn't come as part of the free Prime Video catalogue, there's plenty of great stuff that does - everything from Mr. Robot, Star Trek: Picard, and Justice League to Paddington 2 - so grab a FREE 1-month Prime trial and check it out. Sky subscribers will find that they can also buy and watch The Invisible Man through the Sky Store, which may prove more convenient - pricing is again universal at £15.99. And if you're currently stuck in or out of the UK, remember you can access all the normal services you would at home by using a VPN. Want more great conten? How to watch The Invisible Man in Canada It's also less than clear what ways to watch The Invisible Man there are in Canada right now. We've done a fair bit of digging, and while it's worth trying Amazon Prime Video to see if you get any jow, the only place we can confirm seeing a Canadian price to rent The Invisible Man for online streaming is on YouTube, where it's pegged at CA\$19.99 (+ tax). If you find yourself in Canada and want to stream The Invisible Man online as you would at home, you can do so by using a VPN. The release date for Spider-Man: Homecoming is fast-approaching, and between the recent sneak peek and the hype surrounding the Marvel Cinematic Universe-Sony crossover, it's gearing up to be quite an opening. But there's still more you can learn ahead of time. Like with any superhero project, Homecoming was shrouded in secrecy, but the cat is out of the bag — we now know who plays which characters in the film. Check out who will appear on screen and why they may look familiar. Tom Holland as Peter Parker Tom Holland in Spider-Man: Homecoming | Sony At 21 years old, Tom Holland is the youngest actor to ever portray a superhero in a major motion picture. This was an unusual choice for the project, as the previous two actors to take on the role were significantly older (Tobey Maguire was 30 at the time of his casting, while Andrew Garfield was 26). But Holland has both the youthful appearance and exuberance needed to play Peter Parker. Holland has been acting since he was a child, appearing in stage productions of Billy Elliot the Musical in London's West End. He's a relative newcomer to the Hollywood scene, with roles alongside many acclaimed performers in films such as The Impossible, How I Live Now, and In the Heart of the Sea (where he worked with fellow Marvel staple Chris Hemsworth). But it really wasn't until his first appearance as Spider-Man in Captain America: Civil War that he became a major player. Michael Keaton as Vulture Michael Keaton in Birdman | Fox Spider-Man's nemesis for Homecoming is Adrian Toomes, also known as Vulture. This part is uniquely suited for veteran actor Michael Keaton, who's perhaps best known for playing another kind of winged creature: Batman. Keaton portrayed the DC superhero in Batman and Batman Returns. His career floundered a bit after that, but he burst back on the scene with Birdman, where he got meta portraying a struggling actor who was once known for playing a flying superhero. Apparently, bird-like heroes and villains are what Keaton does best. Robert Downey Jr. as Tony Stark Robert Downey Jr. in Iron Man | Marvel Studios By this point, most people know the Hollywood tale of Robert Downey Jr. He had early success, status as a fringe member of the '80s Brat Pack, and an Oscar nomination before his 30th birthday. However, he then slipped into a downward spiral of drugs, legal troubles, and subsequent rehab, before beginning a comeback in the mid-'00s with films like Kiss Kiss Bang Bang. It was then that Downey Jr. hit his stride, appearing in the hilarious Tropic Thunder in 2008, the same year he began his tenure as Tony Stark. Since then, he has been very busy playing Iron Man (a role he continues in Homecoming), as well as a role as Sherlock Holmes in the 2009 film and its sequel, Sherlock Holmes: A Game of Shadows. Marisa Tomei as May Parker Marisa Tomei | Adrian Sanchez- Gonzalez/AFP/Getty Images Dedicated Marvel fans saw a couple of scenes with Marisa Tomei as the youngest-ever Aunt May in Civil War. This wasn't the first time Tomei had to flirt with Downey Jr on screen: The pair starred opposite one another in the 1992 film Chaplin, the actress' follow-up to her Oscar-winning performance in My Cousin Vinny. Tomei has managed to maintain a prosperous career while generally flying under the Hollywood radar. She has been nominated for an Oscar twice more, for her roles in In the Bedroom and The Wrestler. Additionally, Tomei has had quite a tenure on stage, both on and off Broadway. Jon Favreau as Happy Hogan Jon Favreau in Iron Man 2 | Marvel Studios He's simply Tony's right-hand man in the Iron Man films — or so it would appear. In fact, Jon Favreau is the director responsible for kickstarting the MCU. And that's just the beginning of his Hollywood career, both in front of and behind the camera. Beginning with Swingers (which he also wrote and produced), Favreau has acted steadily over the years. You may know him as Monica's rich, sweet boyfriend, Pete, on Friends, or as Foggy Nelson in the much-maligned Daredevil film. Favreau directed everyone's favorite Christmas flick Elf and, more recently, the live-action Disney reboot The Jungle Book (which he also wrote and produced). Gwyneth Paltrow as Pepper Potts Gwyneth Paltrow | Vivien Killilea/Getty Images Though we now associate her with her lifestyle brand Goop and the term "conscious uncoupling," Gwyneth Paltrow has been a household name for quite some time. The daughter actress Blythe Danner, Paltrow's breakthrough work includes films such as Se7en, Emma, and Shakespeare in Love. Like many actresses, Paltrow is perhaps as well known for her relationships as she is for her on-screen roles. She previously dated Hollywood heartthrobs Brad Pitt and Ben Affleck, and was married to Coldplay singer Chris Martin (with whom she has two children) for several years. Zendaya as Michelle Zendaya | Frederic J. Brown/AFP/Getty Images With just one name apiece for both her and her character, young quadruple threat Zendaya has quickly worked to earn this distinction. Beginning as a model, Zendaya quickly added singing, dancing, and acting to the mix, scoring the role of Rocky Blue on the Disney Channel series Shake It Up. Despite only a few years in the biz, Zendaya has already appeared as a contestant on Dancing with the Stars, and currently has her own sitcom, K.C. Undercover, which is in its third season. Donald Glover as Aaron Davis Donald Glover on Community | NBC We only recently learned the identity of Donald Glover's character: Aaron Davis, known as the Prowler (and uncle to Miles Morales, who later dons the Spider-Man costume). But Glover himself has been an anticipated addition to the comic universe, as the popular actor has been linked to the web-slinger for many years. When he was in his early 20s, Glover got his start as a writer for 30 Rock. Soon after, he began his role on Community, and it was also around this time that he started his rap career as Childish Gambino. Glover is out full force in Hollywood, with his acclaimed series, Atlanta, and his role as Lando Calrissian in the upcoming Han Solo film. Hannibal Buress as Coach Wilson Hannibal Buress | Comedy Central Comedian Hannibal Buress may have sent a body double to the Homecoming premiere, but some may be surprised to know that they might recognize the star from his previous projects. Buress has gained notoriety in the stand-up world, and is known for his regular roles on The Eric Andre Show and Broad City. However, one of Buress' biggest claims to fame is that it was his comedy routine about Bill Cosby that brought the rape allegations against the star into the public light in 2014. Kenneth Choi as Principal Morita Kenneth Choi on Sons of Anarchy | FX One of Marvel's favorite things to do is draw connections between characters, so it probably didn't surprise fans to learn that Kenneth Choi's character in Homecoming shares a last name with that of his 1940s-era part in Captain America: The First Avenger and an episode of Agents of SHIELD. But that's not the only place you know Choi from: The actor appeared in The Wolf of Wall Street and Suicide Squad, and has had recurring roles on the popular series Sons of Anarchy and The Last Man on Earth. Tom Holland's Spider-Man in Spider-Man: Homecoming | Sony Ever since Tom Holland made his debut as Peter Parker in last year's Captain America: Civil War, fans have been eagerly waiting to see him embark on his own adventure in Spider-Man: Homecoming. As its summer premiere date approaches, viewers are gradually getting a better idea of what they can expect from the webslinger's next film. From the movie's multiple villains to Iron Man's role in the film, here are nine of the biggest spoilers we've learned about the upcoming hero flick so far. 1. It won't be an origin story By this point, audiences have seen the big-screen retelling of the spider bite and the death of Uncle Ben twice. Thankfully, we won't be seeing it a third time around. Writers John Francis Daley and Jonathan M. Goldstein have confirmed that the forthcoming reboot will not be another origin story. As Goldstein told Grantland's Andy Greenwald in 2016, "I think that everybody feels like, you know he got bit by a spider and you know Uncle Ben died. We probably don't need to revisit that." The trailer also makes this clear, as it shows Holland's Parker equipped with his Spidey suit and already taking down bad guys (albeit not always successfully). 2. It will be inspired by John Hughes Tom Holland as Spider-Man: Homecoming | Sony Last summer, Marvel head Kevin Feige revealed that the next iteration of Spider-Man will boast a Hughes-like tone. Hughes directed '80s teenage-themed classics like Ferris Bueller's Day Off and The Breakfast Club, which are known for being both emotionally heartfelt and filled with comedic moments. "Not that we can make a John Hughes movie - only John Hughes could - but we're inspired by him, and merging that with the superhero genre in a way we haven't done before excites us," Feige said. 3. Uncle Ben won't appear Martin Sheen as Uncle Ben in The Amazing Spider-Man | Sony Since Spider-Man: Homecoming will focus on Peter Parker in the present and not retell his origin story, the character of Uncle Ben will not be featured in the movie. Per co-producer Eric Carroll, this decision was partly made in order to help maintain the film's lighter tone. "We thought that, to keep this fun, light tone, as soon as they have to have their, like, 'Let's remember our dearly departed father figure' — it derails that a little," Carroll said, per CinemaBlend. "And again, what we're trying to tell is this sort of fun story of the kid who is doing all the wrong things for the right reasons. And once you do that, it stops becoming a fun movie about a kid trying to be a kid. He's mourning the loss of a parent." That being said, Carroll says Uncle Ben will be acknowledged in the movie. "They talk about [Ben], absolutely. It's not... it's not a huge thing that I want to go into too much, but there is an acknowledgment that there was a Ben," he said. "He's not around anymore, for sure. They talk about that. We don't go into any specifics. ... We're implying he's dead. We have not at all, again, gone into trying to change his origin story." 4. There will be a handful of villains Michael Keaton as the Vulture in Spider-Man: Homecoming | Marvel Fans should expect to see more than one bad guy show up in Spider-Man: Homecoming. Michael Keaton is set to play the movie's reported main antagonist, the Vulture, as captured in the images above. As for the other characters you can expect to see stirring up trouble for Holland's Spider-Man? Logan Marshall-Green will portray a still-identified villain, while Michael Chernus is set to play Phineas Mason aka the Terrible Tinkerer in the film. Meanwhile, Bokeem Woodbine is rumored to be playing the Shocker, as seemingly confirmed by leaked on-set photos of him in costume. 5. Mary Jane Watson won't appear ... or will she? Zendaya | Frederic J. Brown/AFP/Getty ImagesZendaya's casting opposite Holland was announced a while ago, but it's still unclear whom she'll be playing. Her character is simply listed as "Michelle," with some speculating that could mean Michele Gonzales, a character who appears in The Amazing Spider-Man as Peter Parker's roommate and occasional love interest. But there's also been speculation that Zendaya may actually be playing Mary Jane Watson (a character previously played by Kirsten Dunst in the 2002-2007 movie trilogy starring Tobey Maguire). Zendaya herself has denied this rumor, telling ET Online that "I'm not Mary Jane unfortunately, but I am in the movie." From the trailer, Michelle certainly seems different from any version of Mary Jane we've seen so far, with her character sporting more of a dry, awkward humor. But some fans are still speculating that she may evolve into a Mary Jane-type character over the course of several films. Whether this will actually be the case and Marvel is just trying to throw us off track, or whether Zendaya will play someone entirely different, remains to be seen. 6. Tony Stark will appear Robert Downey Jr. will reprise his role as Tony Stark aka Iron Man in the upcoming solo Spider-Man adventure. According to Variety, Marvel execs were eager to get Downey and Holland back together after seeing their "great chemistry" in Captain America: Civil War. That could also explain the size of Downey's role in the upcoming movie, which looks to be significant. Case in point: Iron Man has a heavy presence in a recent trailer (captured above) and can be seen mentoring Peter on his superhero duties and even revoking his Stark Industries tech suit at one point. 7. Some scenes will take place before Civil War Spider-Man in Captain America: Civil War | Marvel According to Heroic Hollywood, some early scenes in Spider-Man: Homecoming will take place after he meets Tony Stark, but before he joins the battle against Captain America and crew in Civil War. Audiences will reportedly see Parker get his new suit from Stark, travel to Germany, and engage in the battle (this time, from Parker's perspective) — before abruptly getting sent back to his ordinary life as a high school student. The switch in timelines is meant to highlight the jarring shuffle between Parker's exciting hero life and mundane student life, and how he struggles to manage the two. As Carroll described per EW, "It's kind of the first time you get to see this tone. We're really excited about, and we think is fun. After seeing all this amazing, glamorous stuff, boom... hard cut to him back in his cold weather gear. Riding the subway to school. Crammed next to all the other students, riding public transportation to school and we'll realize that he's still waiting for his call from Tony. 8. The Vulture is seeking revenge on Tony Stark Michael Keaton as Vulture in Spider-Man: Homecoming | Marvel We know Keaton will be playing the main antagonist of the story, the Vulture. Per USA Today, Keaton will play Adrian Toomes, a blue-collar guy who runs a New York salvaging company that cleans up the messes left in the wake of various superhero battles. But business is taken out of his hands after a new government organization, founded by A-list businessman Tony Stark (Downey), steps in to take over the job. As co-producer Carroll described, Toomes is angry and "sort of becomes the dark Tony Stark," teaming up with a crew of villains — including the Shocker (Woodbine) and the Tinkerer (Chernus) — to steal advanced tech and put together amazing weaponry to sell to other criminals. 9. A sequel is already in the works Tom Holland as Spider-Man in Spider-Man: Homecoming | Marvel Spider-Man: Homecoming hasn't even hit theaters yet, but Marvel has already announced a sequel to the film. The follow-up flick is currently set for release in July 2019. That's obviously quite a way off, but if Homecoming lives up to its high expectations, you can bet the rumor mill will start humming before the summer is over. Spider-Man: Homecoming is scheduled to hit theaters on July 7, 2017. Check out Entertainment Cheat Sheet on Facebook!
