SFTTV is a simple application to connect your Android smart TV, your Android mobile device and your personal computer. It allows you to quickly and easily transfer your movies, TV programs, torrents or any file between these devices through the local network without limitations. No Internet required .SFTTV is designed to be simple. The application will automatically find out other devices on the local network with large SFTTV file installed in record time. SFTTV is faster than Bluetooth. SFTTV is the fastest and most private way to send files to your TV.SFTTV programs on Windows, MacOS and Linux. The files can be easily transferred between the machines performing different operating systems. To use SFTTV on the local network, you need to install the Android app on the TV and on each device you want to use for file transfer. SFTTV has a user-friendly user interface! Hi, I'm Yablio, I'm an independent developer. Application and games development on Android TV and Mobile. I want to continue developing the full-time app and release many apps on these platforms. I want to do a lot, especially for Android TV users, to help the community enjoy useful tools and entertainment apps on your TV. But it costs money to do this reality. Hundreds of hours were already spent, and as much as I try, I don't do it enough in revenue from the ads to continue paying how much I should. Even as a UI / UX designer I want to prohibit these horrible and rude ads in my apps. I would like to have these projects a full-time job and could be expanded to include more developers, but, as I said, money is a problem for this to be one thing. It is particularly true for version sending files for TV desktop applications. If you wish to help my cause, or you only like what I offer, please donate.on-time or recurring payments SFTTV es an aplicacity é Fennel Paro Conectar on Android smart TV, on the device MÃÃvil Android y on personal ordor. File sending to TV, also known as the Acronym SFTTV, is a sharing and peer-to-peer file application that allows you to connect your Android mobile device, Smart TV and personal computer. Developed by Yablio, this will be useful when you want to watch your favorite movies and television shows on a large screen.You'll be able to quickly transfer files between these devices through the local network. This Freemium tool is a more complete alternative to extremely popular sharing applications such as Shareit and Xender how can you send files to directly.Simple television, but, PowerFulthis simple mobile app requires any Internet connection for successful files sharing As everyone has done it on the local Wi-Fi network. Therefore, you need to make sure that the devices you want to associate are connected in the same local network every time there connects. It is a fastest choice for schools, houses, offices and other institutions Its transfer speed does not depend on the speed of the speed.if SFTTV speed went below 500 KB / sec, your file sharing is considered too slow. This could be caused by the weak wi-fi antenna so, you need to make sure your device is positioned as close as possible to your Although, keep in mind that sending larger files or transfer them to multiple devices simultaneously tends to take a longer TIME process. To a large extent, it guarantees the safety and privacy of your file transfers that take place only among the Devices and not transmitted through an ISP. This means that it will never be spied or storing your data on any server. It is important to note that all devices involved in file sharing should have installed for transfers to take flexible transfersend files place.convenient and TV app This utility is a great solution for all file transfer needs. Without requiring a stable Internet connection, which allows you to send files between smartphones, desktops and smart TV seamless. Until the devices are connected to the same local network, data transfer can be done quickly and secure.fast and transfersrequires safe no internet connectioneasy-to-useconnect devices seamlesslyno cancellation payment requests optionintrusive Ã ~ imaginas converters canvas canvas Ã © Fono en a ratÃÃn? 'Send files to TV': Appearance of sending files to TV en el mÃÃvil Android TV Puede Instalar Aplicaciones from Google Play y TambiÃf © n en format Archivo Apk, Igual Que Los MÃÃviles. El Problem Radica En Que Hay Que Subir Oen Archiv to your device with Android TV: So much from Que Sea a Tele Como a reproductor. To do this, use a USB pendrive, it also a micro SD card (provided that your Android TV has connectors); Or you can use INVIARE FILE ALLA TV. L'Application that we talk about talk about The transfer of all types of files between the TV and mobile telephony, whether they are photographs, documents or, as if it occupies, apk. The requirement is that sending files to the TV must be installed on the mobile phone and on the device with Android TV; With the obligation that both must be connected to the same Wi-Fi network. The process of installing APK on the TV using send files to the TV is the following; Install the files Send to TV application on the TV (or the player) with Android TV and on the mobile phone. It's in Google Play. I wait to send files to TV on TV install a file manager on your Android TV. Usually Commander files are usually recommended, even if it's worth almost all others when accessing the installation package (most of them). Download the APK file you want your mobile phone. Open send files to TV on TV and also in mobile. Follow the procedure to access the main screen with the 'Send' and 'receive' big letters. Choose the Android TV to send the file Press the 'Send' button of the MÃvil and the look for the APK file. After selecting your Android TV. The file will be sent to your TV or player: By default this will be stored in the 'Downloads' folder ('Downloads'). The APK, AntiTu In this case, it's already on the Android TV, inside the 'Downloads' folder How to send files to the TV You can't install APK (at least at least), you need to open the file manager. Find Download folders, tighten into the received APK, accept the installation of unknown sources and install the application. When you open the APK with the file manager, the process can be installed, it seems a bit 'bulky for the first time, but the following will not need most of the SEND files opened for TV on mobile and on TV, send the 'APK and install it with the file manager. It is the simplest and universal way to make the process as it is VÃlido for any Android TV. Also, send files to TV is free, it has only a few announcements and will serve to transfer any other file, not just APK. It is highly recommended. Recommended.
