The KT 76C

is designed to operate at 11-33 v dc. Punch or cut to proper size to mount the antenna, then re-move the model. Push the command button "VFR" by holding the command Button "IDT" in the depressed position. The unit will remain in TST mode until the mode selection is changed (see Figure 3-3). Page 25 ATCRBS TRANSPONDER KT 76C Once the terminal is in the correct position, close the jaws gently until the terminal is loose in place. To avoid RF interference, the antenna should be physically mounted at a minimum distance of three legls from the KT 76C and the harness. When the ejector is positioned against the stop, the contact locking switch is lifted, allowing the contact to be removed by moderately pulling the cable. Pages 213 to 221 are not shown in this view.
