The videos provide a valuable educational tool for linguistic students to encourage them to improve their skills, including their ability to listen, understanding and language that is an extremely important part of learning the Spanish language. Rules of grammar for the number 100: in Spanish one hundred translates into cien or heavy depending on the sentence or what are you trying to say. The cien is used before the larger one hundred and cient numbers are used before the smallest numbers of a hundred. Some examples of this grammatical rule are the following: - Cien Mil (100,000) save Seis (106). Grammar rules for the number 1000: It is important to understand the rules of the number in Spanish. The number 1000 is found only in the plural when you indicate thousands of. An example of this grammatical rule is the following: thousands of years - Miles de AñA± OS that learn the numbers in Spanish is not very complicated. You have to learn the numbers 1 - 15 that are unique, along with multiples of 10. So it's easy enough to process the larger numbers in Spanish. . Numbers 1 - 15 Los NÁA±Meros One quince. Your browser does not support the audio element. . 16 DieciÁ ± is your browser does not support the audio element. 17 Diecisiete Your browser does not support the audio element. 18 Diecicho Your browser does not support the audio element. 19 Diecinueve your browser does not support the audio element. 20 Vinte Your browser does not support the audio element. TENS 10 - 100 - 10, 20, 30, 40, 50, 60, 70, 80, 90, 100. Your browser does not support the audio element. The hundreds up to 1000 - 100, 200, 300, 400, 500, 600, 700, 800, 900, 1000. Your browser does not support the audio element. . 100 CIEEN 200 DOSCIENTS 300 TRESCRIESOS 400 CUATROCIENTOS 500 Quinientos 600 SECIENTOS 700 SETECIENTOS 800 OCHOCIENTOS 900 VENDECIENTOS 1000 MIL Note that 500 is very irregular and 700 and 900 are slightly irregular. Note also that the numbers from 200 to 900 must agree with the name that refer to: "ochocientos libros" "ochocientas niÁf ± as" the numbers are built by the units listed above the same way in which they are in English. For example: 38 - trevied y och - literally "thirty and eight". Your browser does not support the audio element. . 249 - Shosters Cuenta y nueve- vitaramente "two hundreds of forty and nine". Your browser does not support the audio element. . 1567 - Mil Quinientos sesenta y are - literally "a thousand five hundred and sixty and seven". Your browser does not support the audio element. . Notes: Although the numbers of the 1920s are pronounced in a similar way to the highest numbers, they are written slightly different, - "Veintesimo. Veintidos" (all words) but "trevied y one, trevied y dos, cuenta y a, cuenta y DOS ", etc. ÁXun, one or one? - The number "one" in Spanish is the only number that must agree with the name that refers. This is because the word for "a" and "one" are the same in Spanish. "An amigo" can mean "a friend" or "a friend" depending on the If the name is male, the module "a" is used. For example: an Amigo, an amiga. "Cien" and "skein". The word per 100 is "cien", but when you combine this with other numbers like 105 you need Use "hundred". - "one hundred five" (Also note that the "e" is not used to join words to make the numbers in the hundreds commas and full stops to Break Up Numbers: In English is Every normal SPLIT. 3 digits of a whole number with a comma (eg 3478), and Mark the decimal point with a period (eg 12.45). But in Spanish this convention is reversed, so large numbers with decimals will written 1,256. 78 Interactive EXERCISE 1 correspond to the numbers 1.
