## P99 druid charm leveling guide

East Karana - Classic Levering Guide Eastern Karana is an ideal place to hunt people looking for an area without a lot of traffic in their early adolescence. At the beginning of adolescents you can choose snakes, wolves, carrying spider and older lions. There are also humanoid enemies between these levels, but they usually come in pack, so they exclude them. Most of these enemies are between the levels of 12 -14. The reason I said "some" snakes, wolves and lions, you will notice that here there are two or three different types of enemies. It is important to cheat everything before attacking it until you learn the names of the most address enemies. A gorge hound is the hard wolf, a spider crag is the harder spider and then you will also have the griffawns you will be able to kill closer to 20 you get and your bad eyes. Evil eyes will be rather striked or missed depending on the type of tool you have and if you are a boxer or with a group. The evil eyes throw some decent objects, such as smooth bracelets and their eyelashes / eyepieces, used for a search ... however they can be difficult to kill for a single player since it fascinates and hypnotizes. For the moment I strongly advise you to avoid griffon and cyclops enemies that sometimes patrol through this area. Sometimes you could also see a hill giant that you will surely want to avoid how it will be on the thirties! If things get out of hand, the two closest lines are North Karana to the west and the gorge of King Xorb to the north. If you want to see another script of this area, go to my Ek Farming location. Random Tip: If you are a class that has ensured to use it here! You will have Tea Leaves that are used to do Qkeynos Afternoon Teas! More information about the area - Druids can port directly in this area. There are three different ways to reach this area if you don't take here. The part the area has a zone line leads to King Xorbb Gorges; to the east you will find the High Hold Keep area line and to the west you will find Karana North. East Karana P99 Area Information East Karana Allakhazam Area Information Objects of Interest Spider Silk Wolf and Lion Egg High Quality Cat Flesh Griffon Skin Tea Feathers Tea Leaves (If you can fodder) From the 1999 Wiki Project I wanted to create a quick guide to the Druids for Afghans Fascinating kites from level 14-60. I've written a few, but I need your help making a bigger list. I've created some rules to add animals to this list and here they are: Animals only from outside areas No rare animals Level 12+ Animals From places where you can actually practice kite kite Once you've enchanted an animal, use the Flame Lick spell (Requires the Fire Beetle Eye to cast) to keep the Mafia farm. Or keep remodeling Snare. Level 14-19 Karana East (EQAtlas with overlay) Leveling Take a door to Karana East and tie it to the bridge. Green is the resting area, orange is the killing area. Wherever you have Orange is where all the animals are. On the north side, enchant a blue animal with a white one against and plug your pet. Try to keep them both at the same level of health. Thorns and maybe a dot at the end should also help the fight if you do this [another option is to let your pet do all the damage while just handling aggro; experiment with what uses the least mana]. On the south side of the area you can enchant one of the wolves to fight against an undead Reaver. Level 20-24 Level 25-29 Everfrost Peak à Run and Mammut (EQAtlas with overlay) a woolly mammoth à Everfrost Peaks The map to the right shows a general idea of where six progeny mammoths are located with each red circle. The green dot represents the location of the shaman spell merchant who acts as to sell, a secure point of connection and a place to meditate. The blue path represents my kill path when I do this zone. Mammoths are perfectly grouped into progeny of two to allow you to enchant them down and move on to Next. When I reach the end of the path (near the statue of the model giant of the hill), I simply clear it back, sell, and med up if necessary. On level 28, mammoths near the merchant should be revived long before you come back. Since it is a relatively popular killing/breeding site for the level, it is possible to divide all six pups into three fields. The respawn times are not too terrible and you save yourself from all the running around you have to do. Also, another friendly reminder: Beware of the barbarians NPC (Tundra Jack) when they are wolf-shaped. He'll smash your face. Hunt safe! -Leth (06.05.2013) If an ice bear is standing you can fascinate him for the easy mammoth kills from 28 to 29. Note: As of January 2016, the map does not appear to reflect current mammoth progeny on Project 1999. (I also found this campsite annoying because you're dealing with a lot of green orcs) Level 30-34 Level 35-39 Level 40-44 A huge gorilla à Emerald Jungle Level 45-49 This guide recommended A Raptor and a Vicious Raptor in Timorous Deep. However, since 03.09.2013 raptors are no longer considered animals. Level 50-54 Level 55-60 55-60
