How to install and configure the appium on Windows with the first program to get a kick start on Appium: Appium is an open-source test automation tool used to test mobile applications. It allows users to test various types of mobile applications (such as Native, Hybrid and Mobile Web) using the standard WebDriver library. There are three types of mobile applications: Native: native applications built using iOS, Android or SDK Windows. They're specific to the platform. They are built to work on a platform and/ or device. Hybrid: Hybrid applications are web applications developed using HTML, CSS and wrapper of a native application at the top of UIWeb View for iOS and Web view for Android applications. Mobile web applications: Mobile web applications are apps accessed via mobile browsers.
